

100 Days of Stellar Roadmap

A structured learning roadmap to master the Stellar ecosystem through consistent daily learning and hands-on development.

Phase 1: Foundations (Days 1–15)

Day	Topic
1	Introduction to Stellar & Ecosystem
2	Install Development Environment
3	Stellar Accounts & Keypairs
4	Public vs Secret Keys
5	Lumens (XLM) & Network Fees
6	Transactions & Operations
7	Testnet vs Mainnet
8	Creating Accounts Programmatically
9	Funding Test Accounts (Friendbot)
10	Sending Your First Payment
11	Memo Types
12	Sequence Numbers
13	Multi-Operation Transactions
14	Stellar Laboratory
15	Mini Project: Simple Wallet Explorer

Phase 2: Assets & Payments (Days 16–35)

Day	Topic
16	Assets Explained
17	Trustlines
18	Issuer vs Distributor Accounts
19	Creating Your Own Asset
20	Sending Custom Assets
21	Asset Authorization
22	Path Payments
23	Claimable Balances
24	Sponsored Reserves
25	Payment Paths
26	Liquidity Pools
27	Anchors
28	SEP Standards

29	Cross-border Payments
30	Bulk Payments
31	Mini Project: Token Creator
32	Payment Dashboard
33	Bulk Payment Tool
34	Review
35	Challenge Project

Phase 3: SDK Mastery (Days 36–55)

Day	Topic
36	Stellar JavaScript SDK
37	Creating Transactions
38	Signing Transactions
39	Horizon API
40	Fetching Accounts
41	Fetching Transactions
42	Fetching Payments
43	Fetching Assets
44	Fetching Operations
45	Error Handling
46	Async Programming
47	Building APIs
48	Wallet Integration
49	Freighter Wallet
50	Stellar RPC
51	SDK Best Practices
52	Blockchain Explorer
53	Portfolio Tracker
54	Review
55	Challenge Project

Phase 4: Soroban Smart Contracts (Days 56–80)

Day	Topic
56	Introduction to Soroban
57	Installing Soroban CLI
58	Rust Basics
59	First Contract

60	Contract Storage
61	Authentication
62	Events
63	Tokens
64	Deploying Contracts
65	Testing Contracts
66	Contract Upgrades
67	Error Handling
68	Security
69	Gas Optimization
70	Oracle Concepts
71	Escrow Contract
72	Voting Contract
73	Crowdfunding
74	NFT Concepts
75	Mini DApp
76	Integration
77	Review
78	Optimization
79	Documentation
80	Challenge Project

Phase 5: Real-World Applications (Days 81–100)

Day	Topic
81	Humanitarian Payments
82	Financial Inclusion
83	Stablecoins
84	USDC on Stellar
85	Anchor Integration
86	SEP-24 & SEP-31
87	Disbursement Platform
88	Wallet UX
89	Security Best Practices
90	Open Source Contribution
91	Payment Platform
92	Merchant Checkout
93	Invoice System

94	Escrow Platform
95	Remittance App
96	Polish Projects
97	Documentation
98	Deployment
99	Portfolio Showcase
100	Final Capstone & Reflection

Final Deliverables

- 10+ Stellar projects
- Soroban smart contracts
- Stellar SDK mastery
- Portfolio showcasing real-world applications
- Open-source contributions and documentation.
